Rheem hot water heater customer service

Hot water replacement is common in households, as they wear out over time. The general lifespan is eight to 12 years depending on location, manufacturer's design and maintenance. If yours is showing signs of leaking, water buildup and temperature inconsistency, it could be time to replace it. Nameplate What type of hot water heater do you currently have? When you are looking at hot water replacement, check the nameplate on the side of your current hot water heater. The sticker will include hot water tank specs and helpful information. You'll probably want to buy a replacement that's similar to what you currently have but with some upgrades. Tanks What do you need to know about hot water tanks? You'll need to choose from tank or tankless. Tankless connects to the water source. Most hot water heaters have tanks, so you'll want to find the right size tank based on your family's needs. Storage capacities usually range from 30-80 gallons. Big families will need bigger tanks. The 50-gallon tanks are the most popular size. Fuel Source Your home's fuel source is key in determining gas or electric for the most economical hot water heater. Converting from one to the other will raise costs. Using solar for hot water is an option with gas or electric backups. Gas hot water heaters tend to cost more when you purchase them, but cost less to operate. Electric hot water heaters cost less upfront and use less energy, but they cost more to operate. Other Buying Considerations Consider the tank size before you go to the home improvement store, so you won't be swayed into buying a bigger tank than you need. Find out how quickly it takes for the water to heat back up. No one likes to take a cold shower. In addition, make sure the size of the hot water heater fits the space, and remember to look for energy efficiency ratings. Installation Do you hire the work out or do it yourself? The tanks are heavy and difficult to carry, so if you do it yourself, you'll need help with the manual labor. Do you have the tools and the time for the job? How will you dispose of the old unit? Unless you feel comfortable handling the work, it's usually recommended that an experienced and licensed professional does the installation. Proper installation could affect the hot water heater warranty. MORE FROM QUESTIONSANSWERED.NET I have a Rheem A°C compressor ***AJN**A**. I would like to check my warranty.
